

Managing Kidney Renal Allograft Failure to Re-Transplantation (KRAFT): Challenges and Opportunities

Learning Objective 1: Review the basis for increased mortality burden associated with a history of failed allograft with a focused discussion on those at risk for cardiovascular and infectious complications. 2. Review the inadequacies of managing CKD V in patient with a failed allograft as compared a transplant naïve patient with CKD V and discuss optimal approach to managing comorbidities associated with CKD V in a patient with a failing allograft.

Learning Objective 2: Discuss the dynamic changes in the sensitization status of patients with a failing allograft, the risk factors for sensitization, and the optimal management of immunosuppressive therapies to facilitate re-transplantation.

Learning Objective 3: Discuss the need for a collaborative relationship between the transplant nephrologist and the community nephrologist to optimize patient candidacy for re-transplantation and discuss the application of the British Transplantation Society Guidelines for Management of Failing Kidney Transplant.

1:00pm-4:50pm

Moderators: Martha Pavlakis, MD, Beth Israel Deaconess Medical Center, Boston, MA. Jim Rice, MD, Scripps, La Jolla, CA.

1:00pm-1:30pm

Managing CKD V in Recipients with Failing Kidney Allografts: Are Transplant Nephrologists Up to the Task?

Robert Gatson, MD, University of Alabama, Birmingham, AL.

1:30pm-1:40pm

Audience Discussion

1:40pm-2:10pm

Increased Mortality in Recipients with a Failed Kidney Allograft: Why so High?

John Gill, MD, MS, Providence Health Care, Vancouver, BC.

2:10pm-2:20pm

Audience Discussion

2:20pm-2:50pm

Outcomes of Renal Re-transplantation

Todd Pesavento, MD, The Ohio State University, Columbus, OH.

2:50pm-3:00pm

Audience Discussion

3:00pm-3:30pm

Coffee Break

3:30pm-4:00pm

The Changing Face of Sensitization in Recipients with Failing Kidney Allograft

Carrie Schinstock, MD, Mayo Clinic, Rochester, MN.

2:50pm-3:00pm**Audience Discussion****4:10pm-4:40pm****Collaborative Relationship: Is it Possible to Improve Care of Recipients with Failing Kidney Allografts?**

Jim Rice, MD, Scripps, La Jolla, CA.

4:40pm-4:50pm**Audience Discussion**
